Gwalior

A case reminiscent of the film Jannat has surfaced in Gwalior, where police allege that a high-tech international cyber fraud network was being operated from a rented duplex in the upscale Windsor Hills area.

According to police, the network was allegedly involved in a cyber fraud worth around Rs 100 crore and was being run from a single premises, much like the betting and match-fixing setup depicted in the film.

The Crime Branch and Cyber Wing jointly conducted a raid on Sunday and arrested five suspects in connection with the alleged operation. Police formally revealed details of the action at around 8 pm on

Sunday. Further investigation is underway to determine the network's international links, the scale of the fraud and the involvement of other suspects.

Additional SP Sujawal Jagga says, "... We received a tip-off regarding a major cyber fraud

network operating out of Windsor Apartments. We tasked Manish, our DSP (Cyber ??Crime), with verifying this information. Upon confirmation that the tip was accurate, a team was constituted yesterday to conduct a raid. During

the raid, we successfully busted the cyber fraud network. We seized 23 mobile phones, three laptops, 37 SIM cards, passbooks, and other materials. They operated using a website named '100panel.com,' through which they logged in to receive instructions regarding debits, credits, withdrawals, and deposits. They would receive details of various 'mule accounts' and, after verifying them, process payments using the mobile phones linked to those accounts. The SIM cards used were not registered in their names.

We have arrested five accused persons... As for the five accused, four are locals, and one is from Datia... None of them are older than 28 or 30.

Shivpuri: Doctors at Shivpuri Medical College removed a 16x14 cm hair clump, known as a trichobezoar, from the stomach of a 14-year-old girl during a three-hour surgery.

The teenager was admitted on Sept 11 with stomach pain after suffering from persistent vomiting, loss of appetite and a feeling of fullness for several months. Doctors said the hair clump occupied nearly 90% of her stomach and had extended into the small intestine.
